

Peptides Tailored to Your Research
Manufactured with Excellence

Custom Peptide Synthesis Service with Intavis

- 99% success rate in synthesis
- 3 decades of satisfied customers
- 1.000 papers citing our work
- State-of-the-art facilities
- A wide range of modifications available
- All peptides produced in Germany

For high-quality custom peptide synthesis and exceptional customer communication to accelerate your research, choose Intavis without hesitation.

- Initial consulting tailored to your needs
- Small scale, parallel synthesis
- Large number of modifications
- Continuous feedback on synthesis progress
- Differential analytical methods available
- Certificate of analysis + documentation

We tailor our processes to your requirements.

Custom Peptide Application

- Antibody production
- Pull down assays
- Affinity based purification
- Proteomics
- Drug delivery (e.g. CPPs)
- Diagnostics (e.g. PNAs)
- Drug development

Customized Peptides Synthesis Services

- Length (typically 5 - 50mers)
- Quantity up to 5g
- Modified sequence
- Exchange of amino acids
- Non-canonical amino acids
- Modified C/N-terminal and sidechain residues
- Peptide nucleic acids (PNAs)
- Purities:
